

# Agility Seminars

With Kristy Netzer

July

29-30 2017

### Saturday Morning 9:00 am – 12:30 pm

#### Rear Crosses and Course Analysis

**Beginning and Intermediate Level Students:** This session is for handlers who are getting read to compete or are competing at the Novice/Open level.

**Rear Cross Skill:** Kristy will discuss the rear cross and show the proper way to execute it. Handlers will have an opportunity to work this cross on a variety of sequences.

**Course Analysis:** One of the more difficult aspects of dog agility is running a course and deciding how to handle it and which crosses to use. We will run long sequences and discuss various handling options.

### Saturday Afternoon 1:30 pm— 5:00 pm

#### Difficult Opening Sequences:

**Advanced/Masters Level Students:** This session is for handlers who are competing at the Advanced and Masters level. Many Excellent and Masters courses are starting off with difficult challenges. The decision on how to handle them has a strong impact on how the rest of the course runs. Each dog/handler team will get an opportunity to work some of these challenges in helping them determine the best handling strategy for their team.

### Sunday Morning 9:00 am—12:30 pm

#### Extreme Tunnel Skills:

**Advanced/Masters Level Students:** Tunnels are often taken for granted, but as courses become more challenging, strong tunnel skills are a must. Getting a refusal at a tunnel is heartbreaking! We will work difficult tunnel entrances where refusals would be likely. The second part of the session will be devoted to handling skills when dogs come OUT of the tunnel. How to get a good turn out of a tunnel, how to prepare your dog to turn the correct way, and what to do if you get stuck in the wrong position. The entire class will include drills followed by course work.

### Sunday Afternoon 1:30 pm—5:00 pm

#### Stay ON Course!

**Masters Level Students:** This session will be devoted to handling skills to keep your dog on course when you are presented with difficult off-course options. Examples of such skills include: pushing your dogs around a jump as seen in Premier, using your body to help drive your dog past an obstacle, pulling between obstacles, and bypassing the incorrect opening of a tunnel. The class will include drill and course work.

**Kristy Netzer Bio:** Kristy attended the first ever dog agility seminar in Southern California in 1989. The teamwork, competition, and fun attracted her to this wonderful new sport. With encouragement from her fellow competitors, she started teaching agility in 1995. She has since taught hundreds of students and shown them how to incorporate extraordinary distance skills into their handling systems. In 2010, Kristy produced a video, "Dial Up The Distance" for Clean Run and she writes monthly articles for the magazine.

Kristy's students range from highly athletic handlers who compete on the world team, to physically challenged handlers. She has helped more than 75 handlers earn their Championship titles. Kristy has earned

agility championships with 4 of her own dogs. She is currently running a 3 year old Border Collie named Diggity and has a new puppy who is just beginning to learn the sport.

There will be a 1 hour lunch break both days.

List of local restaurants will be provided.
